INSTRUCTIONS

CATALOGUE DESCRIPTIONS
You won't be disappointed with our Public Domain catalogue! Program descriptions take all the guesswork out of ordering. For example, our game descriptions indicate the number of players allowed (2 PLYR) and whether you use the keyboard (KB), joysticks (JS) or paddles (PDL) to play. We also indicate if a Translator (T) is required with XL/XE models, and provide information on special hardware requirements and loading instructions when needed. You'll want to keep this catalog nearby as a handy reference. It's the answer to all your Public Domain software needs!

THEME DISK COMPATIBILITY
Most of our Theme Disks come in a standard single-sided single-density format and all are Guaranteed to load on *your* Atari 8-bit system. Although some Theme Disks are double-sided, these are not true double-sided disks, and are known in the trade as "flippies". This is because they must be turned over in order to access the

second side. The double-sided disks will run on any drive. Some of the older Atari 400/800 programs may require a "Translator" (T) and some programs will only run on XL/XE models. The catalogue will inform you of a program's requirements.

WHAT'S A TRANSLATOR?
Some software written for the Atari 400/800 models will not run on an XL/XE model without a Translator program to reconfigure the XL/XE's operating system to that of the older computer. To use, first load a Translator (listed in UTILITIES section), then load in the desired program.

HOW TO RUN THEME DISKS
Insert the Theme Disk in your drive and switch on your computer. It's just that simple! Most Theme Disks will display the BELLCOM MENU that allows you to select and load individual programs. Many programs provide documentation (DOC) files to assist in their operation. To load another program, simply switch off the computer and reload the MENU.

SOLVING DISK PROBLEMS
It's unlikely you'll have any problems, but if a program doesn't seem to load right, or if it "freezes", it could mean...
- it's a machine language (OBJ) program and you didn't disable your computer's BASIC prior to loading.
- you're trying to load an older 400/800 program on your XL/XE without first loading in a Translator.
- the program is sitting waiting for your joystick or keyboard input.
Occasionally, you'll find a machine language program that can only be loaded from DOS using the (L)oad option (refer to your drive's manual).
If you keep getting "BOOT ERROR" messages it could mean that your disk has been corrupted in the mail. As all our disks are Guaranteed to run, we'll be happy to replace it free.
Above all, *experiment*, and be sure to read any documentation (DOC) files that may be provided on the disk. If you try everything and still find yourself stuck, we're here ready to assist you. Simply drop us a line.

■ D-81 PEDROKKO #4

Side 1 features familiar sayings by the Star Trek characters and crystal clear sound effects from the series. Side 2 contains a Mission Impossible spoof, a TV ad, plus a playable game for the XE Light Gun with actual digitized 44 Magnum gunshot sounds.

■ D-82 PEDROKKO #5

Sides 1 and 2 contain actual theme song and voice excerpts from the Teenage Mutant Ninja Turtles series. Hear amusing voice samples of the Turtles, Splinter, Shredder and others.

■ D-83 PEDROKKO #6

Side 1 contains additional voice excerpts from the Teenage Mutant Ninja Turtles series, while side 2 contains larger "scenes" created using Turtles sound track samples. (Side 2 requires 130XE and player from #D-78)

■ D-84 PEDROKKO #7

Sides 1 and 2 feature classic cartoon favourites. Hear familiar sayings of Yosemite Sam, Bugs Bunny, Elmer Fudd, Daffy Duck, Porky Pig, Sylvester and others in Pedrokko's unique "Cartoonie" scenes. (A bonus "Marvin the Martian" file requires player utility from #D-78)

■ D-85 PEDROKKO #8

Side 1 contains a "Cartoonie" with Bugs Bunny and Elmer Fudd, plus digitized samples of the Three Stooges. Side 2 features scenes with Foghorn, Porky Pig and Sylvester. (Side 2 requires player from #D-78)

■ D-86 PEDROKKO #9

You'll laugh out loud at the sound of Yosemite Sam riding his stubborn camel on side 1. Side 2 contains that classic scene of Bugs Bunny meeting Marvin the Martian. These large digitized samples will bring back many fond memories! (Disk requires 130XE and player from #D-78)

■ D-87 PEDROKKO #10

Side 1 features the actual sound of an Australian Kookaburra bird, while side 2 presents the digitized TV theme song for a popular Australian comedy show. (Disk requires 130XE and player from #D-78)

REVISIONS
Several Theme Disks have recently been revised or removed. If you have experienced problems with these disks, then perhaps the solutions below may help you. If not, then please write for assistance.

■ 068 TURBOBASE 1.1
TurboBase 1.1 has been removed from the library due to an elusive program "bug". If you purchased this disk from us, then return it in exchange for a free BELLCOM disk of your choice.

■ 289 P.S. HOLIDAY ICONS
Please note that these special icons are in Atari DOS format with a "PSF" extender, and can't be accessed directly from Print Shop. They must first be converted to the Print Shop format by using the Shop Tool utility (included on the disk).

■ 302 P.S. BORDERS & FONTS
This disk has been removed from the library due to file access problems. If you purchased this disk from us, then return it in exchange for a free BELLCOM disk of your choice.

■ 331 LANGUAGES
Some users experienced an annoying "screen flipping" display when running these programs on certain Atari

systems. This problem has been corrected. If you purchased this disk from us and have had problems, then return it for a free revised version.

■ 354 TURBO BATTLESHIP
Turbo Battleship has been removed from our library due to a "bug". If you purchased this disk from us, then return it in exchange for a free BELLCOM disk of your choice.

■ 359 IN JEOPARDY!
This disk has been removed from our library as it was found that the Final Jeopardy round couldn't be accessed. If you purchased this disk from us, then return it in exchange for a free BELLCOM disk of your choice.

■ 378 EUROPEAN DEMOS #1
Several of the larger demos failed to load on some systems due to memory conflicts with the menu program. This problem has been corrected. If you purchased this disk from us and have had problems, then return it for a free revised version.

■ D-30 THE NEW DIGITAL EDITOR Modified v3.6!
This DTP program has been brilliantly enhanced and improved upon by Tom D'Ambrosio. If you purchased Digital Editor from us prior to October 1991, and don't have the newer modified version 3.6, then return it in exchange for a free updated version. You'll love it.

■ D-64 BobTerm 1.21
Bob Puff has released an enhanced version of BobTerm 1.1 with dozens of improvements. If you purchased this disk from us prior to October 1991, and don't have the newer version 1.21, then return it in exchange for a free updated version.

ATTENTION XL/XE USERS
If you have a program that won't load or run properly, first check its catalog listing. If a "(T)" is indicated after the program's description, a Translator program must first be loaded into your XL/XE computer in order to run the program.
